

PERFORMANCE+

Cleaning instructions

crevin

PERFORMANCE+ is a fabric concept that guarantees clean and untroubled living and working spaces.

Thanks to its easy clean properties, soils and stains can be easily removed from an **PERFORMANCE+** fabric. For a thorough periodical cleaning, **PERFORMANCE+** fabrics can be machine-washed at 30°C.

The protection of **PERFORMANCE+** is safe and frequent cleaning will not damage the fabric.

Designed for high-traffic areas with an elevated risk of soiling and staining, PERFORMANCE+ fabrics are very easy to maintain and practically all kinds of common stains can be easily removed. For easy day-to-day maintenance of your PERFORMANCE+ fabrics follow the instructions below.

Stain Removal

1. Treat stains as soon as they occur.
2. Remove any excess of soiling material using absorbent paper in the case of spills and oily stains, and a knife or spatula in the case of crusted or dried-on stains.
3. Wipe the stain with a clean cloth using a solution of lukewarm water mixed with a few drops of neutral detergent or handwash.
4. With persistent stains moisten or spray the upholstery fabric directly with soapy water and then rub. Repeat the treatment if necessary.
5. When the stain has disappeared rinse with clear water to remove all soap residue, and rub dry with a clean towel.
6. Let air-dry at room temperature. Do not use hair dryers.

Note: in case water rings or water stains remain after the cleaning, clean the entire surface area of the sofa cover, from seam to seam.

Machine-washing

1. Wash the sofa covers inside out and with the zipper closed.
2. When the sofa cover uses Velcro instead of a zipper, attach a protective cloth or strip over the Velcro, this to avoid damage to the fabric.
3. Use neutral detergents and do not use softener.
4. Wash at the recommend temperature (in case of doubt, wash at 30°C), using a washing program with delicate cycle.
5. Use minimum centrifugation (800 rpm).
6. Do not wash with other textiles and do not load the washing machine excessively.

Drying

1. With the cover still moist stretch in both directions.
2. Dry flat at environmental temperature.
3. Avoid direct exposure to sunlight.
4. Always assure that the cover is completely dry before usage.

To evaluate the environmental impact of Crevin fabrics as part of their Life Cycle Assessment (LCA), the following care and maintenance practices are considered:

- Machine wash sofa covers once a year at the recommended temperature.
- Regular monthly vacuuming.
- A product lifespan of 15 years.
