

PURE PERFORMANCE™

Made to stay

crevin

The material changes everything

In contract spaces, fabrics do more than make an impression. They endure heavy use, accidental stains, and daily wear.

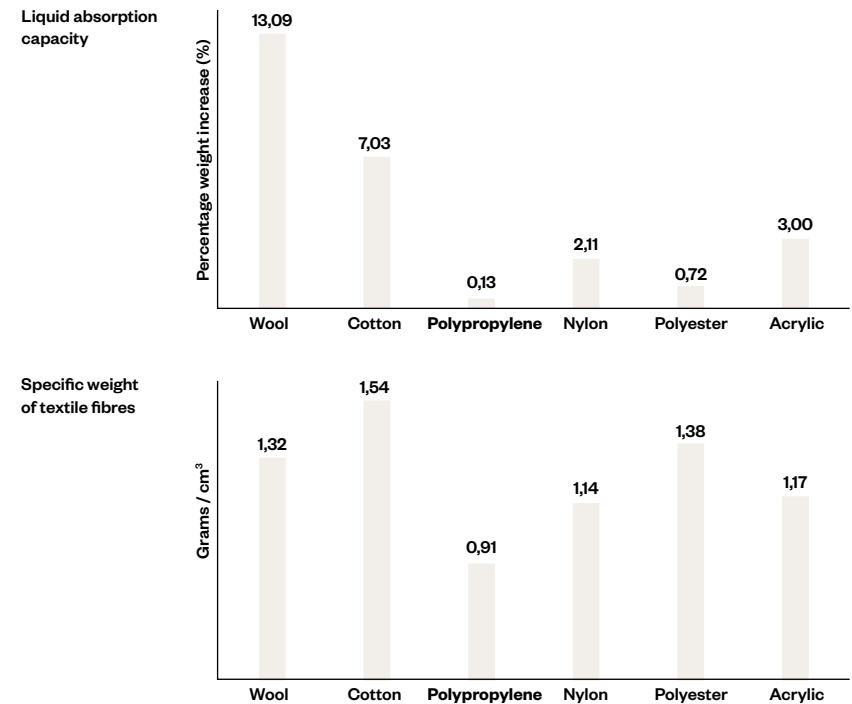

Performance is not determined by the finish. It is engineered into the fibre itself.

Polypropylene: performance from the source

PURE PERFORMANCE™ fabrics are made with solution-dyed polypropylene yarn.

A fibre with one key property: It doesn't absorb. It repels.

Simplified cleaning

Liquids do not penetrate the fibre. They remain on the surface.

- Immediate stain removal.
- Quick and easy cleaning with soap and water.
- Chemical cleaning products can be used without degrading the fibre.

No additional treatments. No PFAS.
Easy cleaning and maintenance.

Real durability

Performance does not fade over time.

- Good resistance to abrasion and intensive use.
- Chemical resistance.
- Complies with BS5852-0 (cigarette).
- Flame resistance (BS5852-1) available upon request.
- High colour fastness thanks to solution dyeing..

It's not about lasting longer. It's about not deteriorating.

Thermal comfort

Performance can also be felt.

- Breathable.
- Good thermal insulation.
- Dry feel.

Consistent comfort, even under intensive use.

Inherent hygiene

Because polypropylene does not retain water, it is hypoallergenic:

- Helps prevent the growth of microorganisms.
- Reduces the presence of bacteria and fungi.
- Naturally contributes to a hygienic environment.

Hygiene built into the material.

Efficiency and sustainability

Fewer processes. Greater efficiency.

- No additional dyeing process.
- Lower water and energy consumption.
- Longer service life.

Lower impact throughout the product lifecycle.

Applications

In addition to meeting the demands of continuous and intensive-use environments, **PURE PERFORMANCE™** fabrics are suitable for:

- **Hospitality**

Contract and intensive-use spaces with high requirements for durability, easy cleaning and compliance with fire reaction standards.

- **Healthcare**

Spaces where hygiene and the maintenance of upholstered furniture are particularly critical, as well as antibacterial resistance.*

*The following **PURE PERFORMANCE™** fabrics can be cleaned and disinfected with a solution of **80% water and 20% bleach**: Libra and Terra, as well as **PURE PERFORMANCE™** fabrics suitable for outdoor use.

- **Workplace**

Spaces subject to continuous and intensive use, where durability, easy maintenance and comfort are essential for upholstered furniture.

- **Outdoor and demanding environments**

The following **PURE PERFORMANCE™** fabrics are resistant to external elements and suitable for outdoor use: Dolce, Vita, Alba, Brisa, Salina, Sauló, Bora Bora and Corda.*

*For outdoor use, the cleaning and maintenance instructions provided in the **Crevin Outdoor Guide** must be followed.
